

NETTLES CONSULTING

Your OT is exposed...

Jan Kopřiva

Security Consultant & Trainer

jan.kopriva@nettles.cz

How are we doing when it comes to OT on the internet?

**If you identify OT exposed on the internet,
how are the asset owners likely to react?**

Lessons learned from the Czech Republic...

tag:ics country:'CZ'

Well, maybe we didn't actually achieve that much?

Not everything is bad, though...

- Basically, everything that was really “critical” has disappeared
 - Water treatment plants etc.
- Lot of what remains are devices operated by small companies and individuals...who unfortunately don't seem to care much about security

Do you want to gather your own data from Shodan?

- Feel free to use TriOp for a start
 - <https://untrustednetwork.net/en/triop/>

Thank you for your attention!
