

What?

Uniform, unambiguous incident classification framework

Why?

- exchange of statistics
 - distributed trend analyses
 - incident handling
 - ?
-

How?

The incident description object

When?

First version planned by the end of June

Who?

- Rob McMillan
 - Andrew Cormack
 - Yuri Demchenko
 - Jan Meijer
 - ???
-

Issues

- Extensible
- Minimize lingual/other confusion
- Usability
- Unambiguous

- Purpose included in object
 - ???
-

Criteria for attributes

- Essential for incident handling/statistics exchange
 - Evidence of use and utility
 - No attributes that can be derived from others
 - OBJECT
-

An Example

INCIDENT {

access: (Confidential, Trusted teams, Public, ??)

purpose: (Active incident handling, Statistics, ??)

what:

how:

where: ??

when:

experimental: {}

private: {}

}
