Slide 1

# TI mission statement

The Trusted Introducer must foster trust and cooperation between CSIRTs in Europe, both new and experienced. The vehicle used to achieve this is to invite CSIRTs to present themselves and describe their service according to an established baseline – thus enabling objectivity, which is regarded as the pre-requisite of trust.

# TI process team levels

- Level 0 : “known” teams registered in the public TI database
- Level 1 (temporary state) : teams that have chosen to join the TI program
- Level 2 : teams that fulfil the criteria under the TI program, which includes a baseline presentation in the public TI database and an advanced presentation in the restricted database
