

## RIPE 66 Dublin, May 13-17, 2013

The RIPE community met from May 13th to 17th in Dublin, IE for RIPE66.

<https://ripe66.ripe.net/>

- Bulk Data Anonymization:
  - is there an algorithm that preserves relationship(s) across anonymization?
- Future of the `irt`: object?
  - your input and your participation is needed!
- Proposal to relax the „double“ authentication (to address holder only) to create `route`: objects in the IRR
  - discussed in DB-WG and Routing-WG, seems to be dead, but... 😊
- Internationalization of the Registry and all tools and UIs, APIs,...
  - to be introduced to the Services-WG (brought up again by Pjotr)
- Abuse contact data exchange between RIPE NCC  $\leftrightarrow$  (national) CERTs?

## RIPE 66 Dublin, May 13-17, 2013

And of course...

BCP38

Open DNS Resolvers

and rate-limiting (which works only for authoritative servers)  
which for bind9 costs money ☹

Q: has anyone already installed bind10?
